

LABORATORY OBSERVATION

Course: Full Stack Web Development

Course Code: 23CM4121

Experiment No.: 1

Student Name: G.Kavya

Roll No.: A24126552082

Date: 30-08-2026

TITLE

Develop a College Information Portal Using HTML and HTML5

AIM

To understand and implement the fundamental building blocks of HTML and HTML5 for creating structured web pages.

OBJECTIVES

- Create a valid HTML5 document and structure a college information webpage.
- Use headings, paragraphs, text formatting, hyperlinks, lists, tables, and images.
- Design a student registration form using common HTML form controls.
- Apply semantic HTML5 elements and modern input types.
- Embed audio, video, and an iframe in a webpage.

CONCEPTS COVERED

- HTML5 Document Structure
- Basic HTML Tags
- Text Formatting
- Hyperlinks
- Lists
- Tables
- Images
- Frames / Iframes
- Forms
- HTML5 Semantic Elements
- HTML5 Input Types
- Audio & Video

TASK DESCRIPTION

Part A: Basic HTML – Create a valid HTML5 document, display college information using headings and paragraphs, apply text formatting, create ordered and unordered lists, and add hyperlinks to the college website and Google.

Part B: Tables and Images – Create a student details table with Roll No, Name, Branch, and Email, and insert the college logo and a relevant image with alternate text.

Part C: Forms – Design a student registration form containing Name, Email, Password, Gender, Hobbies, Branch, Comments, Submit, and Reset controls.

Part D: HTML5 Features – Use semantic elements, embed audio and video, and use HTML5 input types such as Email, Date, Number, Color, and Range.

ALGORITHM / PROCEDURE

1. Create an HTML5 document using the DOCTYPE declaration and html, head, and body elements.
2. Add the page title and college header information.
3. Create navigation links using the nav element and anchor tags.
4. Add college information, formatted text, ordered lists, and unordered lists.
5. Create a student details table and insert the college logo with alternate text.
6. Design the student registration form using text, email, password, radio, checkbox, select, textarea, submit, and reset controls.
7. Add HTML5 controls for date, number, color, and range inputs.
8. Add semantic header, nav, main, section, article, and footer elements.
9. Embed audio, video, and iframe content.
10. Open the HTML file in a browser and verify the displayed webpage.

PROGRAM / SOURCE CODE

The following pages contain the submitted HTML source code screenshots.

```
<!DOCTYPE html>
<html lang="en">

CODE EXPLANATION

HTML Element / Feature	Purpose
HTML5 DOCTYPE	Declares that the document uses HTML5.
head / title	Defines document metadata and the browser page title.
header	Contains the college logo, heading, and introductory text.
nav / a	Provides navigation links to Google, the college website, and page sections.
section / article	Organizes related college information into meaningful content blocks.
strong / em / u	Apply bold, italic, and underline formatting.
ol / ul / li	Create ordered and unordered lists.
table / tr / th / td	Create the student details table.
form / input	Collect student registration information.
radio / checkbox	Allow single-choice gender selection and multiple hobby selections.
select / option	Provides the preferred department dropdown.
textarea	Accepts longer comments or messages.
audio / iframe	Embeds audio and external webpage/video content.
footer	Displays contact information and copyright information.

TEST CASES AND EXECUTION DATA

Test Case	Verification	Expected Result	Observed Result	Status
TC-01	Page loading	College portal page is displayed	Portal page displayed	Pass
TC-02	Navigation	Navigation links are visible	Links visible	Pass
TC-03	Student table	Roll No, Name, Branch and Email are displayed	Student table displayed	Pass
TC-04	Registration form	Required form controls are displayed	Form controls displayed	Pass
TC-05	HTML5 features	Audio, video and iframe content are visible	Audio/video/iframe visible	Pass

OUTPUT

The following are the actual browser output screenshots supplied for this task.

ANITS - College Information Portal

Welcome to the official College Information Portal.

About Our Institution

Anil Neerukonda Institute of Technology and Sciences (ANITS) is a student-focused institution known for *practical learning* and *industry-ready training*.

a prominent autonomous engineering college located in Sangivalasa, Visakhapatnam, Andhra Pradesh. Established in 2001 by the Anil Neerukonda Educational Society, it is permanently affiliated with Andhra University and approved by AICTE.

Top Highlights

1. Modern classrooms and smart labs
2. Career guidance and placement support
3. Sports, cultural, and technical events

Campus Facilities

- Library and digital resources
- Hostel and transport services
- Wi-Fi enabled study spaces

Popular Programs

We offer a range of undergraduate and postgraduate programs designed to build real-world skills and leadership qualities.

Undergraduate (B.Tech) Programs

1. Computer Science & Engineering (CSE): Core and emerging fields like Artificial Intelligence, Machine Learning, and Data Science with high seat capacities (240+ intake each).
2. Electronics & Communication Engineering (ECE): Focuses on core hardware, VLSI, and embedded systems.
3. Electrical & Electronics Engineering (EEE) & IT: Traditional high-demand branches with dedicated modern labs.
4. Core Engineering: Civil, Mechanical, and Chemical Engineering.

Postgraduate (M.Tech & MBA) Programs

1. M.Tech: Advanced specializations including VLSI, Machine Design, and Computer Science streams.
2. MBA: General management and specialized tracks like Hospital Administration.

RESULT

Thus, the College Information Portal was successfully developed using HTML and HTML5. The webpage demonstrates basic HTML structure, text formatting, hyperlinks, lists, tables, images, a student registration form, semantic elements, HTML5 input controls, multimedia, and iframe embedding. The supplied browser screenshots verify the implemented features.
